These dogs to improve with children! they are calm dogs and they show love to all!!! I love it! they don't seem to like other dogs as much as humans, but they're still amazing!!! I think they are good with the family so they can get more love. They love it when the tummy is rubbed! so they will remind you to do it daily. (Probably not all of them) ☺☺☺ 2 weeks, 5 days ago Charlie's pastime has been with me since he was 9 weeks old. He was the best companion I've ever had. Even so far, he surprises me and my husband with how smart he is. When he wants or needs something, he tells us in his own way. He can ask for everything, fresh water, treats, go for a walk, even if he wants us to go to bed because he won't go without us. Over the course of these 15 years he has been through good and difficult times with me. Especially when I was sick for a few years, he never left my side. At his age, people still ask me if he's a puppy. He keeps us busy and was in pretty good health. He started with arthritis issues now, but I started giving him holistic solutions and really helped him. I hope he will live a few more years because when he goes, I don't know what I'm going to do. 1 month, 1 week ago pastime My Chi-Pu is a short-haired woman weighing about 14lbs. She has very long legs (which we didn't expect when she was a short little puppy) and she can work very fast. She's like a mini-dog guard of sorts. She always tells us quickly there are any signs of life outside our home. She barks well with other dogs, but she'll bark at some dogs for walks, and it may seem aggressive, but she's really just saying: "You better not touch my family or something along those lines. Dog dog She is always quick to overtake all the other dogs. Sometimes she limps. Her hips are very fragile and they will rotate. This seems to be normal for dogs of its size. It doesn't cause her pain, and it rarely happens. All we do is rub her leg, and then she goes back to normal walking. She has PERSISTENT water eyes. We have no idea how to help her. We gave her medicine, took her to the vet a few times, but we're still clueless. Her eyes started to water about 1 1/2 years. 1 month, 2 weeks ago Pastime He always makes me relax 2 months. 3 weeks ago Pastime is just a puppy, she sleeps a lot, only her during the day 3 months, 3 weeks ago Pastime does not experience only yet learning 4 months, 1 week ago pastime Play, embraces Walking Hes adorable. He pot trained easily, a big puppy aside from wanting to chew shoes. 4 months, 3 weeks ago Pastime He is a very energetic dog and he barks very well ☺☺ 5 months ago Pastime She is very energetic, Learns to quickly bring, always licking bites without meaning territorial with her toys can not sit still long enough to just cuddle a very curiously hard pot train at first needs a sequence does not mind to be alone, if the work will be more to eat and play for a few hours 5 months ago Pastime Running to play with toys 5 months, 3 weeks ago pastime She was saving find on the side of the road in a box. We had it for two weeks. She learned her name in less than two days. It is almost broken at home - to the pads, as it is cold outside. We have treated her for a kennel cough and she will have a follow-up appt for two days. Our main concern is her casual growl and wearing of teeth. She attacked the vet. Work on it right now. 8 months ago Pastime Cleaning Bath time Nap Play Groom Look out the window I have 3 Rosie in my daughter another 2 and from my second litter, I have been breeding them for a few years and love the breed, they are affectionate, loving and very loyal. I would have been lost without them. I look after them daily as their hair is long and tight and they go into the living room every 3 and 6 months basic care with only one and a full groom on the other. I'm disabled so cool for me as I can't move far and they're great at entertaining myself when out. they love to be near me and follow me from room to room. My eldest two caught me off guard and did a naughty act too soon after the last litter so the new one of the 3 who are now 6 weeks old and utterly adorable to see the photo. I love wasting time brushing them and will bathe them between salon visits. they are quite easy to tant training from puppies and very very intelligent, tiny can unlock zippers so anything it travels in that has must have a security system. they can be a bit fussy with the food and the trick is to keep the variety of food that is there and usually you get the one they will eat, they love treats and I mean the man as well as the canine ones. I find that tear staining staining according to the instructions of allergy vets and half of the antihistamine morning and night cleanses this and makes the fur really white again pretty quickly. However, due to recent events, new garbage and castration operations to stop more puppies. I have to put on hold for both old dogs and you can see the difference very quickly as it comes back to the way it was before. Just a great fun and attractive breed of dog with a great personality. Rosie is a bit of a monster if not entertained on a regular basis and can stand up for all sorts of mischief. 9 months, 1 week ago the pastime of pickles love other dogs. He is not a person, although he is usually very careful with new people and takes some time to feel comfortable around them. It took a long time to pot the train, but all the other tricks like sit, shake, show me your paws (his standing on his hind legs), he learns pretty quickly. He's happy to do whatever you do, if you don't want to do anything that he'll curl up with you on the couch, want to go to the beach he'll get in the water. Since he doesn't like people that many people, he won't go far if he's off the leash. Pickles attached to one person, but still loves at all that is in the house to hold. Doesn't lose a lot of hair, but have to be brushed every few days, or it looks messy 9 months, 2 weeks ago pastime styling at the Sun Shake Fetch Chase Tug Of The Rope Walk We Love !!! We got it at 6 weeks and she was absolutely amazing. We just celebrated her second birthday, she's a bit naughty (her nickname is a monster), but she's very affectionate and loving, and doesn't usually get into trouble when we're with her. She's very smart and she trained quite easily. 11 months, 2 weeks ago pastime of The Tricks of Walking Car rides cuddling Fetch Elvina was an excellent companion. She's very smart, but she can be stubborn sometimes. She likes to bring especially with her balls or squeaky toys. She is 4 pounds and likes to go for walks. She's a french fries sucker and is at the window ready for fries before we turn into the restaurant parking lot! She can be a bit temperamental sometimes, but overall she is a loyal and enjoyable family member! 1 year, 2 months ago pastime It was awesome so F. It brings me a lot of joy 1 year, 2 months ago Pastime 1st Chipoo.she wanted to go on evening car rides to see cows. 1 year, 3 months ago Tinkerbell Pastime is a cute girl, she is 4 pounds. She is not a fan of big dogs, but tolerates small dogs. She befriends people 1 year, 3 months ago Pastime plays tug-of-war Love take it, walks on the wheelchair side Best game chasing 2 of 3 cats Pebbles will play only with balls at home Pebbles is 7 months old, we got it for 7 weeks. A very attractive and playful dog, goes edolally in the morning running around the house and garden trouble he has no brakes. Having trouble getting it there is really very fussy. House training is kind of, but it goes on pads. Hate on the left We take him with us most of the time. He hates cold and rain, but loves snow. For a small dog it is a bundle of energy. 1 year, 6 months ago pastime Walking in the park ... Playing with our two other dogs It was a learning experience and very exciting. 1 year, 6 months ago Pastime She is lively and cheerful. Loves people! When it pulls on a leash, etc., when people approach. Doesn't mind other dogs. Never seen her aggressive in any way, but she barks at the noises. It took us a good 6-9 mos to get her fully home training. Ugh is probably what we did wrong. He taught her to ring the bell, which she does. Got it for the kids, and now it's mine! I like her company when we hang each other on the couch. Love as she gets excited every time we see her. Cats don't do that! I bathe her every week and get her groomed every 6-8 weeks to keep her hair shorter. It doesn't destroy anything. I take her for walks a couple of times a week, if it's hot, it stops and I have to carry it a little bit. Oh, she's always chasing our pet cats. I can't cure her of that. We shout zoe's name a lot. zoe stop barking! Don't stop chasing cats! She has been in good health, no issues so far. It feeds on dry dog food. 2 years, 1 month ago Pastime My Chi-Pu has the traits of a chihuahua to be next to one person. But she is still friendly and loves other petting her. She's my best friend, and she was by my side when I had emotional breakdowns. She's the best. I wouldn't know what to do without her. 2 years, 1 month ago Pastime We purchased here in 8 weeks. She was easily house trained. She uses a pot pad when we are not at home and has her own bathroom. Our daughter chose her and she was her dog. When she went to college, she became our (hubby and I) dog. Daughter has been out of college for over 4 years and Jeweltz is still our dog. She's a princess at home. The only issues she had were some hip bias/knee dislocation. Recently lost a few teeth, but very often for a small dog at her age. She's barely seven pounds. She was also a healthy loving dog. Very protective. We didn't communicate with her when she was young, so she didn't tend to other animals. She rules our house, and she knows it. We keep the TV at 24/7 so she's never alone. Our princess dog. 2 years ago, 2 months ago Pastime Urine is a very energetic and intelligent little puppy. When we first got her, at 9 weeks old, my mom was skeptical about keeping her because she thought potty training took a long time to perform. It took my mom two weeks to receive her. She learned to go outside when she needed to in the first few weeks. We taught her to ring the bell when she needed to get out. In the time she knows how to go outside to do her thing, come when called, sit, look at me, and when it's time to go to bed. We try to keep her in the usual schedule so she can know what will happen next. Urine is now a big part of our lives and we are so happy to have it with us! 2 2 2 months ago Pastime We found Jeffy as a puppy in a shelter when my son was 14 years old, as a gift to him. But I trained him, fed him and walked with him, so he got close to me. He was the most loyal companion since my divorce. He eats everything you put to him. He thrives on treats. I taught him how to do the tricks he loved. Jeffy likes to wake up, do tricks and get treats, other dogs, sleep next to me, chasing squirrels and birds, and announces strangers or cars or trucks he hears outside. Jeffy travels well. He shakes like a sheet on the vet, nervous on the groomers until she takes it, very good for them. He stopped the vets when they hurt. He never bites me, but I felt his teeth closed against my skin. Jeffrey escaped, and I could only catch him again with liver treatment. He's not a water dog. Jeffy has diabetes, but until then he was the best home trained. I could never brush my teeth like he chewed a toothbrush, so he had a terrible breath. Professional cleanings have occurred, but cost too much to do often. I will miss him like no other dog I have known. A true companion of my life, better than a husband or son even. 3 2 years, 3 months ago Macy's pastime is very protective of everyone in the house, it does not heat up to strangers easily, she likes to cuddle, does not like to be alone and learns easily, but check the waters often with the rules. 2 years ago, 4 months ago Pastime Chip is the king of the house. He loves everyone in the house, but he's attached to me. Leaving him at home is not easy it can be sure that you feel bad for leaving him. However, he never has a mess or becomes destructive when he is left at home alone. He trained for a few weeks with him as a puppy. Probably with the help of my 13-year-old dog. 2 years, 4 months ago pastime I love to play bring tug-of-war Walk My experience with my dog hope is unique to my family. None of us had ever had a dog before this 1st dog and we are very lucky to have taken it out of the shelter. We knew we didn't want a small dog, and when we saw it, we knew it was her. When she first saw us, she was very excited, non stop licking, and I mean nonstop. She got to the point where she was tired of licking and fell asleep on my chest. It's been two years since we had our dog. It is very protective of my family and very territorial. In some ways it's bad because I don't want her to always bark at every stranger, but at the same time I understand because of where she was taken from I believe she's afraid that someone will take us away from her. For all that she is a big dog and definitely has the same personality as me and family. I could tell she was perfect for us, and just as her name she gave us. Hope. 2 years ago, 4 months ago Pastime He was a fantastic dog. At 9 weeks he was fully pot-trained. He doesn't bark, and he doesn't chew or destroy things. He drives together in cars Also it does fantastic on a leash. He loves people, is very affectionate and sleeps all night. I couldn't have asked for a better dog. 2 years, 4 months ago pastime Well, this is his sixth day with me, so I have nothing to say ... He is very lively, intelligent, tenacious, and loves to chew sock! 2 years, 6 months ago Pastime Love, playful, loves to cuddle and play with my other 2 dogs 2 years, 7 months ago pastime Cuddling GOING ON CAR RIDES Playing with toys visiting the belly outdoors rubs sleep together Walking Unexpected breed for me. Never thought I'd end up buying mixed rock, but I saw her on the farm she was so fragile and painful and quiet I immediately chose her. It turned out to be just fine after a year or two of dealing with bad skin. She had to have her fur shaved off and had to eat a ton of medication. We thought it might have been the genes of the parents. Nowadays she is all happy and still playful. She looks very young and people still think she is a puppy sometimes. Two years ago, eight months ago, I still have a pastime. She is so sweet, loves to be very close to you, as it should always be touching. When you're sad, she's sad, too. Likes to walk or just run around the house a little before getting tired. She's friendly, but she's more attached to me than anyone else. She's sad when I'm not around, and she needs to pick another person to follow her. Sleeps quite a bit, doesn't eat too much, so it's very cheap to take care of, but a lot of fun! This is an amazing dog! 2 years, 8 months ago
