If you need to install Windows XP but you lost your original XP Setup CD, downloading Windows XP is tricky since it is no longer available from Microsoft. There are many places on the internet to download Windows XP, but there are probably no legal sources. Windows XP is not distributed on the Internet, so there is no legal way to get Windows XP downloaded, even from Microsoft. No matter where you find it, whether through a torrent site or other website distributing software, any XP download you come across online is probably not legal. The only guaranteed legal course of action is when you need a copy of Windows XP to buy one. It's really that simple. Lifewire/Grace Kim The important drawback of free download Windows XP is that it is too easy for him to turn on malware or other unwanted software complete with the operating system. On this note, if you manage to force Windows XP ISO, you will need valid license information in order to activate the software, and most OS downloads come with crackers and keygens that try to authenticate the software illegally that you should avoid. Even if you download Windows XP, what you get is a Windows XP Setup CD image. For example, you'll probably download an ISO XP file like Windows-xp-pro.iso, or something like that. You will then burn this ISO image on the CD, which will then be used to install Windows XP. In many ways, what you actually pay when you legally buy a copy of Windows XP is the key product (sometimes called CD key or key code, or as a serial number). This unique number is required while installing Windows XP. So even if you found a Windows XP CD to download, you would still need a valid XP product key to install and use Windows. If there is a Windows XP product key, but you missed your Windows XP CD, you could argue that since you actually buy XP and you have a valid product key and should be able to legally download the Windows XP CD image from everywhere. Microsoft is not on board with this argument, however. Currently, the only legitimate way to obtain Windows XP CD is to legally purchase an operating system. Contact Microsoft to replace Windows XP Setup CD, assuming you can show proof of purchase. If you have a large-brand computer, you may also have the good fortune to contact them directly to replace the Windows XP drive or restore the drive. Another way to get a copy of Windows XP is to purchase it online. You can order Windows XP on Amazon from limited third-party vendors and possibly other websites that offer older programs such as eBay. If it's just the Key Of windows XP product that you're looking for, you don't need to download XP or purchase a new XP installation drive. Learn how to find the Windows XP product key for this. Windows XP is an outdated operating system. Since its release in 2001, several new iterations have succeeded in it, all of which have introduced new features and better security. If you want to download Windows XP so that you can have a new copy of Windows, you'll probably better download Windows 10 instead, which is the newest version of Microsoft Windows. In fact, you can even purchase Windows 8, Windows 7, or Windows Vista, all of which have replaced Windows XP. On the same note, Windows XP is no longer updated by Microsoft, but you can still go back to. If you're looking for the latest and greatest version of Windows, you should avoid downloading Windows XP and instead just switch to a new edition of Windows.
